

SUMMARY OF PRODUCT CHARACTERISTICS

NAME OF THE PRODUCT

Bezo-Pet ®

COMPOSITION

Specific lubricant for the digestive tract in cats and dogs.

ACTION OF THE PRODUCT

Bezo-Pet® is a paste on an oily basis; it coats the stomach and digestive tract with an extremely lubricious mucous layer. Foreign bodies may obstruct the intestinal tract, with adequate lubrication, however, spiral peristalsis of the conical stomach will aid to their normal passage and eliminate chronic irritation of the mucous membrane. As properties of Bezo-pet® helps maintain a healthy digestive tract such obstructions should not appear. Routine use is recommended for long haired breeds of cats (Persian) and for cats kept indoors and therefore without access to coarse fibres (grass) to induce vomiting and thus naturally expelling obstructions.

USE

Bezo-pet® is used to lubricate the digestive tract and to maintain natural movement. Thanks to its pleasant taste, Bezo-pet® is willingly taken by pets and can be administered directly into the mouth without mixing with food.

RECOMMENDED DAILY INTAKE

| | |
|--------------------|--|
| <i>Lubrication</i> | <i>1 teaspoon (5ml) a day</i> |
| <i>Routine</i> | <i>1 teaspoon (5ml) 2-3 times a week</i> |
