

Monosof™ sutures, monofilament nylon sutures

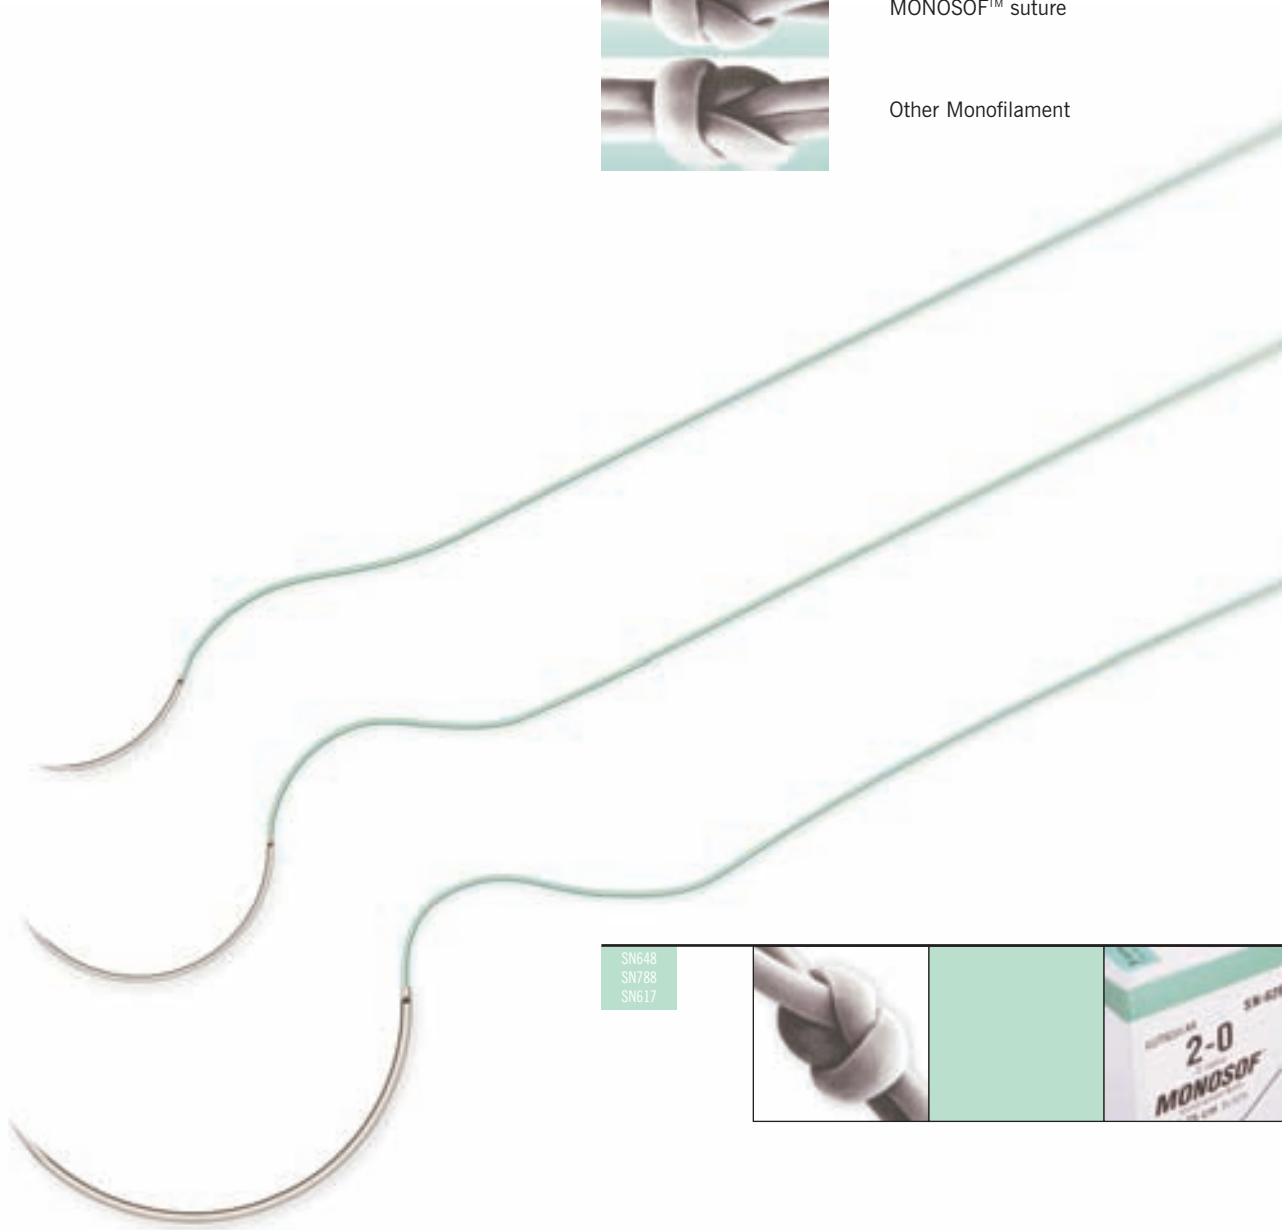

MONOSOF™ has great plasticity leading to better handling.

- Improved compliance leads to greater knot security compared to other monofilaments.

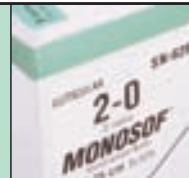

MONOSOF™ suture

Other Monofilament

SN648
SN788
SN617

Monosof™ Sutures

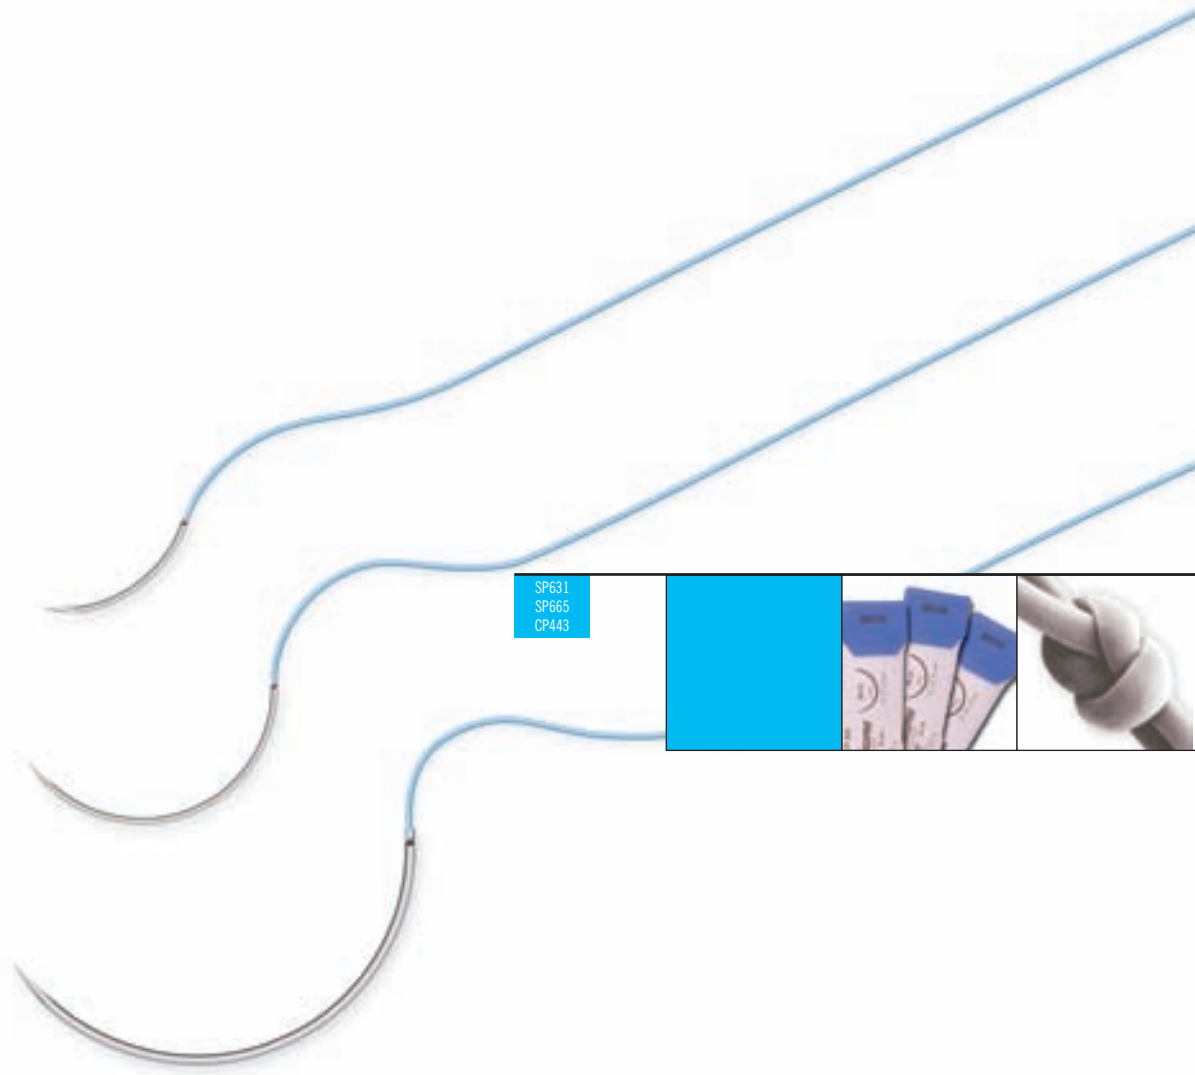

Surgipro™ sutures, monofilament non-absorbable polypropylene sutures

- Smooth passage through tissue
- Excellent knot run down and security
- Class leading strength
- Uniform diameter of suture

Strength

- No significant change in strength retention is known to occur in vivo
- Very useful for all procedures where prolonged support is needed

Surgipro™ Sutures
